Langkah-Langkah Instalasi dan Running Kode:

- Buat sebuah virtualenv baru
- Jalankan "pip install –r requirements.txt" pada direktori kode
- Di shell script anda, buat environment variable berupa password user anda, dengan mengetikkan "export MY SUDO PASS=<password user anda>"
- Buka file server_4.py, sesuaikan path instalasi NGINX anda, pada potongan kode, path instalasi NGINX terdapat di /usr/local/nginx. Ubah menjadi path dari instalasi NGINX anda.
- Buka file nginx.conf yang terdapat pada direktori kode. Copy isi dari "location /compressed" ke file nginx.conf yang terdapat dalam path instalasi NGINX anda.
- Setelah semua dependencies terinstall dengan baik dan environment variable telah dibuat, jalankan satu per satu dari file server_1.py hingga server_5.py
- Untuk masuk ke halaman input, buka URL localhost:3030 di browser anda.

Step by Step Implementasi:

1. Membuka halaman untuk input URL download.

Simple URL Downloader & Zipper

https://downloads.dell.com/ma https://downloads.dell.com/ma https://downloads.dell.com/rdc https://topics-cdn.dell.com/pdf. https://downloads.dell.com/ma https://downloads.dell.com/ma https://downloads.dell.com/rdc https://downloads.dell.com/rdc https://downloads.dell.com/rdc

Download!

Enter 10 Valid Download URL!

2. Masuk ke halaman Download. Terdapat informasi system date, proses download masing-masing file, dan proses kompresi, serta secure link.

Compression completed

Secure URL generated. Download it here: http://127.0.0.1:80/compressed/compressed.zip?st=kKAuja1vsUIUNLKdkuWAiA&e=1592503323

3. Mengklik Secure URL yang disediakan. Akan langsung terdownload file bernama compressed.zip. Dalam ilustrasi diatas secure URL yang dihasilkan adalah: http://127.0.0.1/compressed/compressed.zip?st=kKAuja1vsUIUNLKdkuWAiA&e=1592503323 dengan parameter st adalah md5 hash dari file dan e adalah expiry time dari file tersebut.
